INTRODUCTION

GENERAL. This Parts Book contains a complete list of parts for the 77 and Super 77 Series HC, KD, Diesel and LP Gas tractors.

The Book is divided into twelve sections. (See Table of Contents, page II.) Each section is subdivided into groups or units to simplify the listing of the parts. Each group or unit of parts is illustrated by an "exploded view" which shows the position of each part in relation to the other parts. In each group, part numbers and reference numbers are listed in numerical order. A complete description of the part, the quantity used, and the tractor serial number are shown opposite the part number. A numerical listing of assemblies and a numerical index are given at the back of the book. Below are instructions which will save time in using the Parts Book.

ILLUSTRATIONS. An "exploded view" of each unit shows the individual parts clearly and in their proper relationship to each other. Reference numbers only are shown in the exploded view and these numbers correspond to those in the reference number column in the part group listing. Do not order repairs by reference numbers.

PART NUMBER. See page IV for Part Number Identification.

PART NAME AND DESCRIPTION. Each part is described by its function in the group in which it is listed. The basic part name is in bold type followed by the description. If other parts are interchangeable and will work in the place of the part listed, these are also shown and identified. Where special parts can be used in place of the regular production part in special combinations, the regular production part is identified as "Regular" and the special parts as "Special". Special parts are identified with the tractor model on which they are used. "S" or 900000 number hardware parts are listed in the column under the tractor parts with which they are used.

NUMBER REQUIRED. The total number of parts used per tractor is shown opposite each part number and also the total number of "S" or 900000 hardware parts used with parts is shown.

SERIAL NUMBERS. The serial numbers designate those tractors on which the part is required for repairs. If the part is current, only the beginning serial number is given. If the part has been replaced in production, but is still required for repairs, both the beginning and ending serial numbers are given. No attempt has been made to identify special modifications of the basic tractor models, so in some instances the part may not be used on all of the tractors within the designated serial span. Serial numbers started at 320001 on the Row Crop 77, 269001 on the Standard 77 and 403001 on the Indus-

trial 77. They continued up to 354447 on the Row Crop, 274050 on the Standard and 403563 on the Industrial at which time the series of numbers were changed to 3500001. All three models of 77 tractors carried this series of numbers and run consecutively up to 4505123. The Super 77 Series tractors were then released and at the same time the serial number series were again changed beginning with 6001 and running consecutively on all three models. Motor serial numbers have been used in some cases instead of tractor serial numbers for parts pertaining to motors only, similarly, Hydra-Lectric Control and Hydraulic Control unit serial numbers have been used for parts pertaining to these units. The tractor serial number is stamped on the name plate which is located on the right side of the rear frame or on the instrument panel. The motor series number is given with the motor serial number which is stamped on the crank-case in the lower rear right-hand corner next to the clutch cover. The Hydra-Lectric or Hydraulic unit number is stamped on a machined surface on the base plate directly in front of the gear shift lever socket.

HARDWARE PARTS. Hardware parts with "S" prefix part numbers or 900000 numbers are listed under the parts with which they are used and are described as to their description and size.

INDEX. A Table of Contents on page II gives the Parts Book sections and a list of the groups in each section. The number and name of each section is shown on the outside top corner of each page to give a quick sight reference. An alphabetical Index to Groups is given on page III. A Numerical Index begins on page 12-17. Throughout the Parts Book pages are numbered 1-3, 2-6 or 7-5 etc. The first number represents the section number and the second number the page number in the section.

PRICES. Part Prices will be found in the Parts Price Book.

INSTRUCTIONS ON ORDERING REPAIR PARTS. When ordering repairs, always give the serial number of the tractor. If parts for the carburetor, magneto, generator, starting motor or any unit assembly with a model number or serial number are ordered, give the model number and serial number. The part number and descriptive name of each part ordered should be given. Specify whether shipments are to be forwarded by freight, express or parcel post.

DETAILS OF ASSEMBLIES. The letter "S" (used in the prefix part numbering) identifies an assembly of parts which may be a partial or complete assembly. The assembly part numbers are listed in numerical order beginning on page 12-1 which lists parts comprising each assembly or package.

TABLE OF CONTENTS

SECTION I	TRACTOR-GENERAL	SECTION VI	CLUTCH
Drawbar	1-1	Clutch and Clutch Controls	6-1
Seat	1-6		
Wheel Guards, Extensions and Splash Panels	1-16

PART NUMBER IDENTIFICATION

As a general rule, all parts having similar function have the same basic number. For example: All rear axles have the same basic number 699, 1MA-699-G is the part number of the rear axle for the Row Crop 77 tractors. 1M-699-E is the part number of the rear axle for the Standard and Industrial 77 tractors.

Generally, the prefix letter on the part number indicates the model of tractor on which the part was first used. Some parts are used on more than one model. Part numbers with prefix letters A, B, C, D, E, F, H, J, K or L as well as part numbers with prefix letter M may be used on the 77 and Super 77 Series tractors.

B Prefix Letter Part Numbers . . . Row Crop 70 Agricultural tractors.

C Prefix Letter Part Numbers . . . Row Crop 80 Agricultural tractors, and Standard Row Crop Agricultural tractors.

D Prefix Letter Part Numbers . . . Standard 80 Agricultural tractors, Industrial 80 tractors, 18-28 Agricultural tractors, 35 Industrial tractors, and 35 Engine Over Axle Transmission, 35 Motor Grader Units, 35 and 28 Road Grader Tractor Units.

E Prefix Letter Part Numbers . . . Super 55 Tractors.

F Prefix Letter Part Numbers . . . Standard 70 Agricultural tractors, Industrial 70 tractors, and 25 Industrial tractors.

H Prefix Letter Part Numbers . . . Row Crop 60 Agricultural tractors.

J Prefix Letter Part Numbers . . . Standard 60 Agricultural tractors and Industrial 60 tractors.

K Prefix Letter Part Numbers . . . 88 and Super 88 tractors.

L Prefix Letter Part Numbers . . . 66 and Super 66 tractors.

M Prefix Letter Part Numbers . . . 77 and Super 77 tractors.

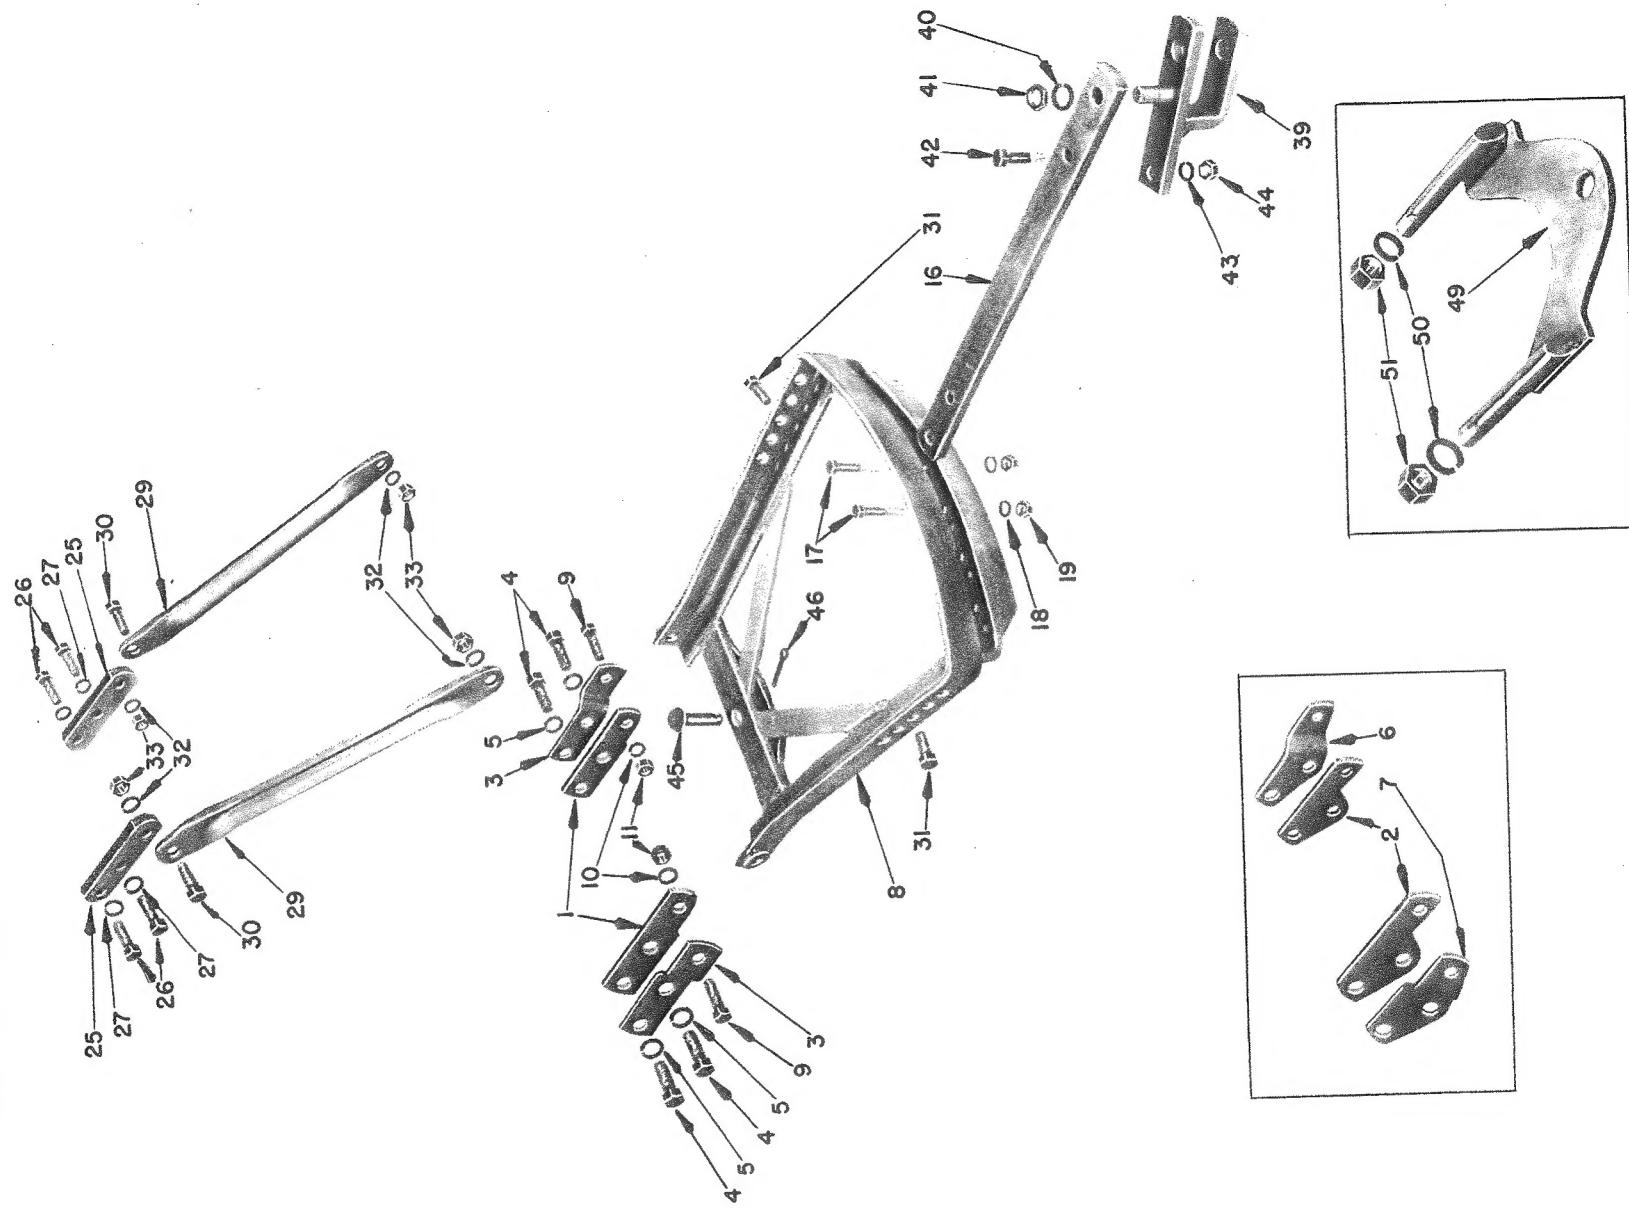

The suffix letter indicates a change in the part affecting interchangeability. For example: 1K-1451-A Rear Wheel Hub U-Bolt supersedes 1K-1451 Rear Wheel Hub U-Bolt, both parts are required for repairs as they are not interchangeable. However, in many cases the advanced suffix letter part can be used for the earlier tractors in which case the Parts Book so states.

As a general rule, the second prefix letter, except R, S, and U indicates a change in the part not affecting interchangeability. For example: 1KA4422 Oil Filter Gasket supersedes 1K-422 Oil Filter Gasket. Both parts are interchangeable (1KA-422 is made of cork and 1K-422 is made of paper).

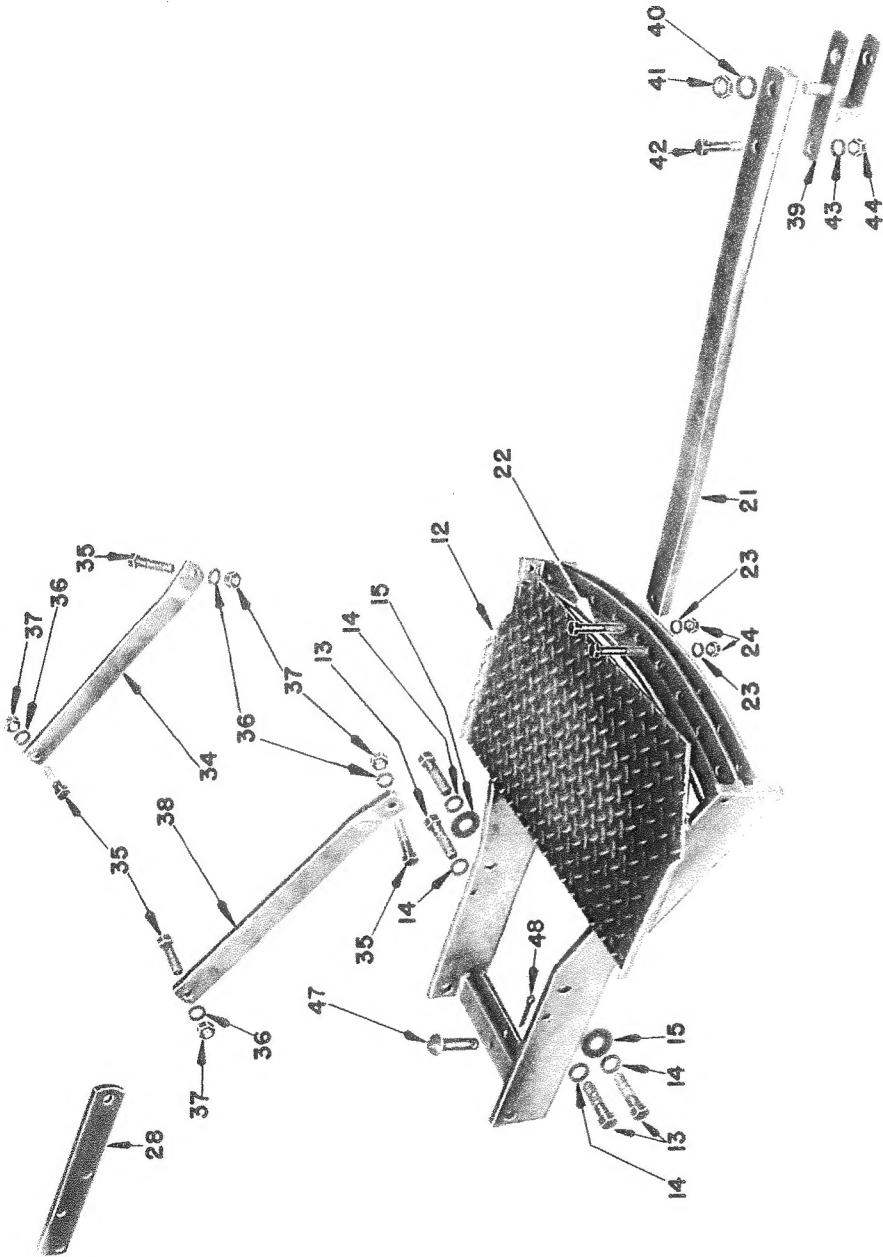

The second prefix letter R indicates that the part is used for repairs only.

The second prefix letter S indicates an assembly of parts. For example: 1K-260 Governor Weight Carrier when assembled with 1K-262 Governor Weight and 1P-263 Governor Weight Pin makes the assembly 1KS-260. Sometimes the prefix letter S may be the third prefix letter. Prefix letters that follow prefix letter S indicate subassemblies.

The second prefix letter U indicates that the part is undersize, O indicates that the part is oversize.
